

UNILIN Master Oak

Choose Recovered Wood

Visually stunning and durable materials will make all the difference for any modern, contemporary, or traditionally designed space. They set the tone for the rest of the kitchen, office, or retail area, so it's important to be diligent in searching for the perfect wood type.

Did you know that Unilin Master Oak panels are made from 100% recovered wood?

This unique process of panel production includes 95% recycled wood content, which means customers receive a highly sustainable panel product without compromising the authentic look and feel of Oak veneer.

UNILIN Master Oak features that matters to you the most:

Sustainability

UNILIN only uses 100% recovered wood

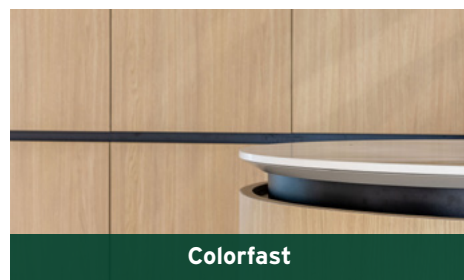

UNILIN particle board products are made of 95% post-consumer and 5% pre-consumer wood.

Comprehensive collection

Seamless Design

Master Oak panels are complimented by matching HPL and Edgebanding.

Colorfast

170 hours under UV light with no visible change to color

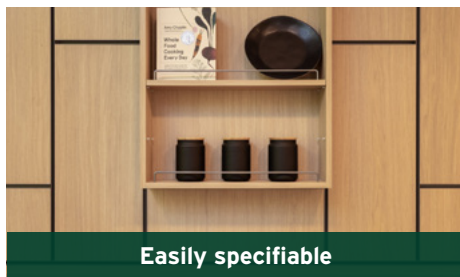

Master Oak surfaces are also stain-resistant and easily cleaned.

Built to last

Highly scratch-resistant

Master Oak is produced using the latest industry technologies. Unilin Master Oak provides a surface that is ideal for high traffic, active use applications. This sustainably developed, premium performance decorative panel is assured to last for years.

Easily specifiable

Perfect for your next design project

Master Oak offers a sustainable, premium design that can be customized to meet your project needs.

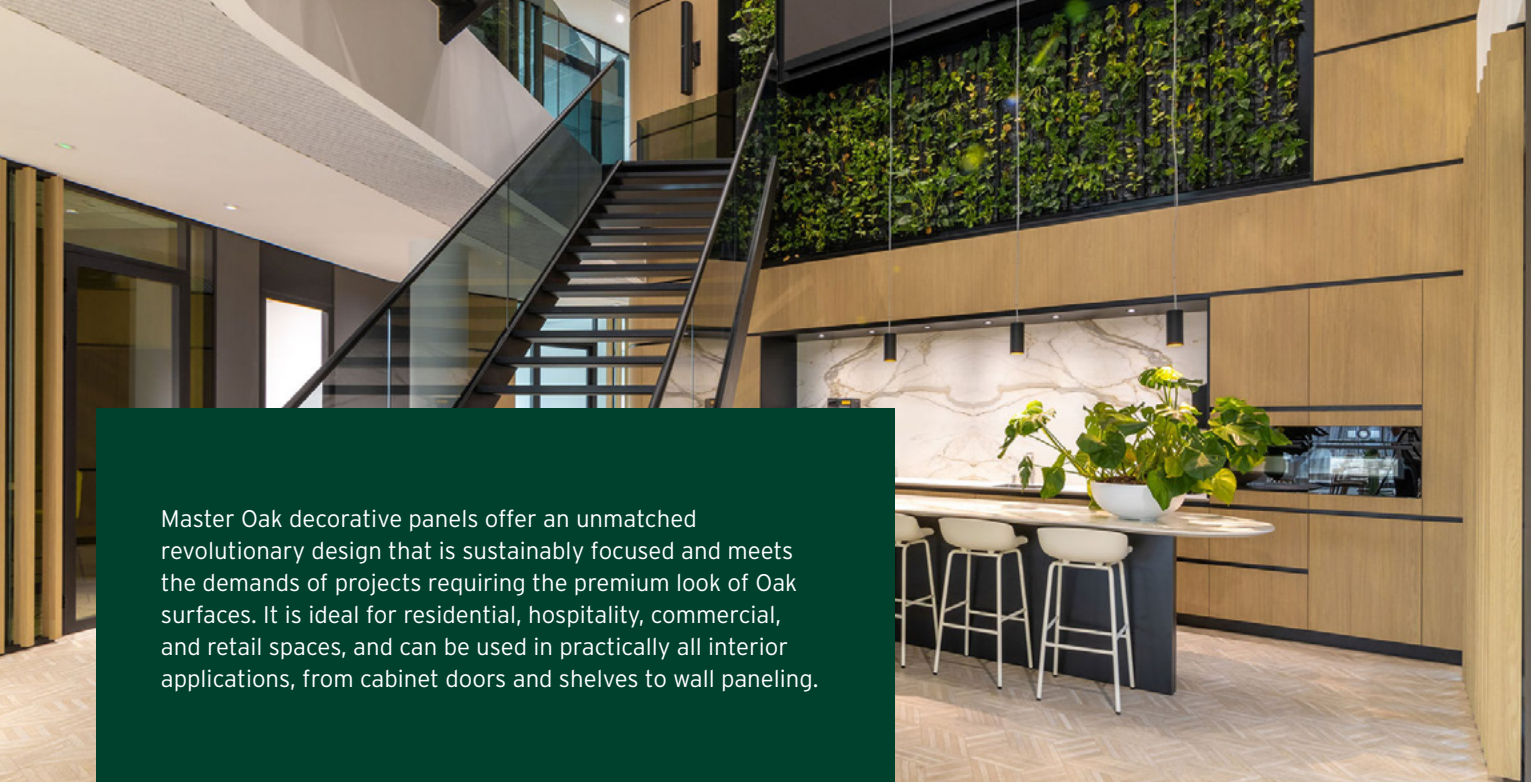

Fire resistant, moisture resistant, FSC® Certified, and low-formaldehyde panels are available upon request.

One source of material

One-stop-shop for all your panel, edgebanding, and laminate needs

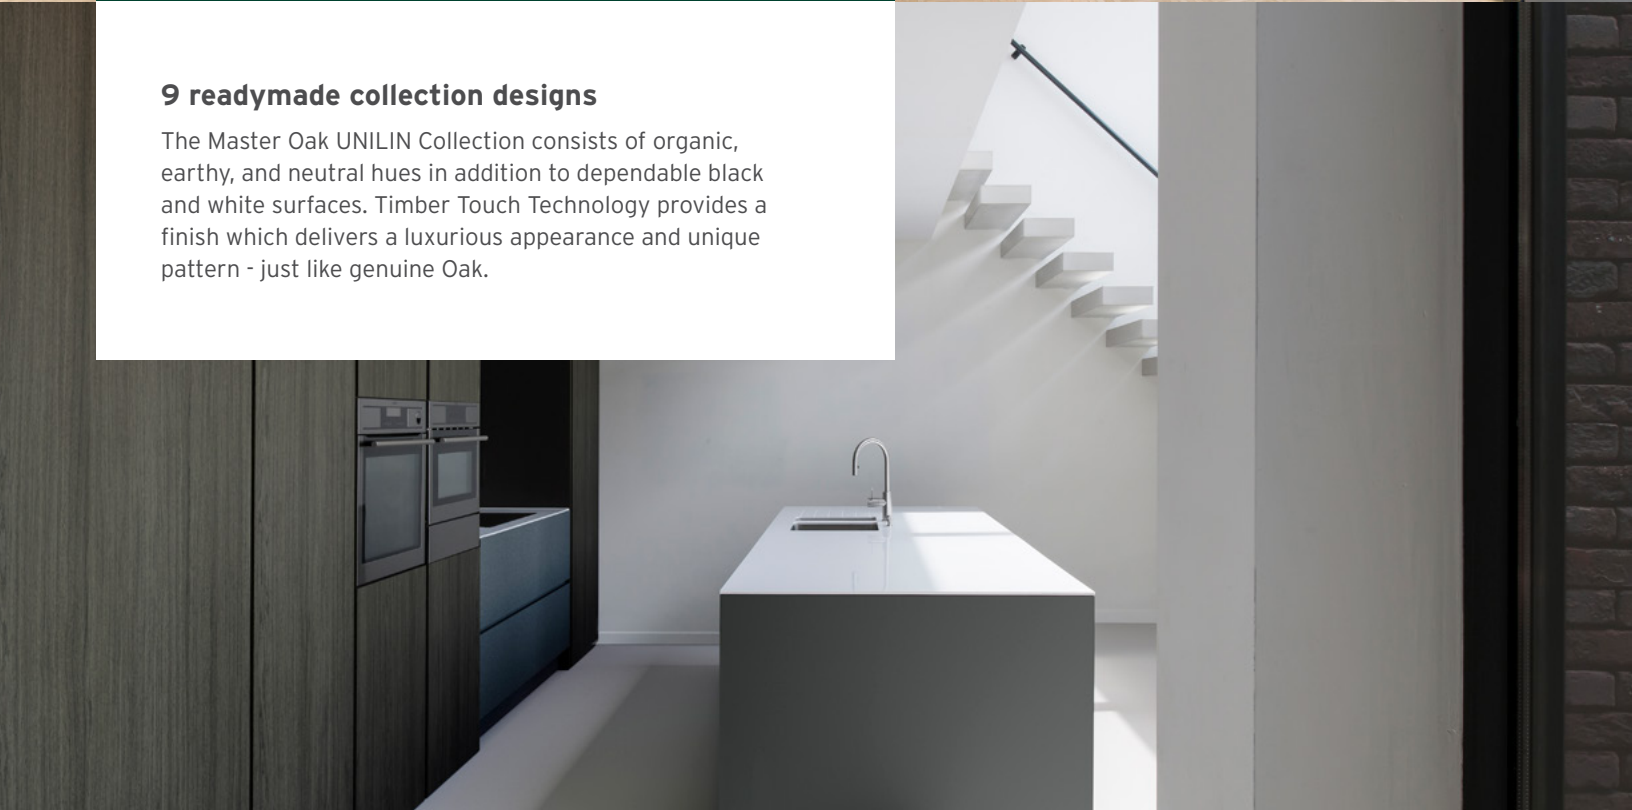

We offer a complete Master Oak stocking program that is supported by UNILIN's vertically integrated production, guaranteeing a consistent design without interruptions in color, look, or texture.

Master Oak decorative panels offer an unmatched revolutionary design that is sustainably focused and meets the demands of projects requiring the premium look of Oak surfaces. It is ideal for residential, hospitality, commercial, and retail spaces, and can be used in practically all interior applications, from cabinet doors and shelves to wall paneling.

9 readymade collection designs

The Master Oak UNILIN Collection consists of organic, earthy, and neutral hues in addition to dependable black and white surfaces. Timber Touch Technology provides a finish which delivers a luxurious appearance and unique pattern - just like genuine Oak.
